Work Offered

Software Developer Internship

We're looking for motivated, passionate, undergraduate students in a STEM related field of study to take part in our 12-month Junior Software Developer Internship at our Mississauga Canada HQ. If you're passionate about the mobile industry, enjoy learning new technologies and creating real-world business solutions, we want to hear from you!

As a successful candidate, you'll get the chance to work with leading edge technologies to take on complex and interesting projects as part of fast-paced, highly collaborative agile teams. You will work with, and learn from, talented, fun-loving developers, breaking down complex problems into simple solutions. You have a passion for software architecture and design and enjoy building robust scalable applications in a cross-platform environment. You are a creative, curious, self-starter who can co-ordinate with a team yet work independently towards a common goal.

What's in it for you?

The People - From our humble origins in our founder's basement, to our industry leading position today, SOTI has worked hard to foster a company culture that we can all believe in. A culture that emphasizes personal growth, continuous innovation and fun.

The Growth - Our environment fosters new ideas, fresh perspectives, and the ability to take them over the goal line. SOTI is a fast-paced environment with a global reach that encourages you to make your mark and be part of something big!

The Technology - You'll get the chance to work with leading edge technologies and take on complex and interesting projects, as part of highly collaborative and agile teams. You will work alongside SOTI's partners which include leading tech giants that will keep you on the cusp of emerging technologies.

What You'll Do:

- Develop innovative solutions to tackle big industry problems
- Write well designed, scalable, reliable, testable and reusable code by using best software development practices, clean code and solid principles
- Provide technical guidance on the research and development of new products and services
- Contribute towards the entire development lifecycle of analysis, design, implementation and test
- Detect, report, investigate, and fix product defects
- Automation, including writing unit and integration tests
- Optimize and apply best practices
- Maintain high standards of quality for code, technical documentation, and deliverables
- Participate in implementation of web solutions in C#, .NET, Java, JavaScript, Linux, Angular, Android core, Android Studio, Android for fun, Windows.
- Participate in brainstorming and idea generation activities
- Stay up to date with advanced technologies in order to be able to provide the best solutions for new projects

About SOTI

At SOTI, we celebrate the uniqueness of our global teams and are proud to be an equal opportunity workplace. We are curious problem solvers who are committed to bringing the best mobile and IoT management solutions to market.
